Impress Best Creativity

Do you know ...

Phenomenon of dye-sublimation printing was invented in America. This type of printing currently is applied in the whole world.

Sublimation print is one of the thermal transfer technology and based on occurrence of sublimation, i.e. transition from the gaseous phase to solid phase.

Pigments in dye-sublimation ink are transferred onto the sublimation paper in the form of solid state. Sublimation print can be performed on group of polymers which, in contact with high temperature "relax" their structure and as a result the micro pores open up. In the thermal press the pattern printed on sublimation paper converts from the solid phase to gas phase and then permeates into micro pores of polymer where they turn into solid phase and after cooling it becomes permanent.

Smart Desktop Laserbox

Laserbox is a smart desktop laser cutter specially designed for creation. It reimagines and redefines laser cutting by the use of a high-resolution ultra-wide-angle camera together with AI visual algorithm. These two technology give Laserbox the ability to see. It can auto-focus, auto-identify any official material and then set up the cutting-engraving parameters accordingly. Being a revolutionary laser machine defining operation through hand-drawing, Laserbox makes laser creation easy and fun! Just leave it all to Laserbox!

Laserbox has CE, FCC and FDA certificates. The laser has been classified as Class 1 laser by FDA, which is non-hazardous.

Frequently Asked Questions

What's sublimation product?

By applying sublimation coating to the exterior of objects, for example mugs, plates, metal boards and etc., photos are printed under the dye-sublimation process, producing extremely bright, vivid and colourful images. The digital images could be scenic pictures your own portrait, or any personal collective images. First, printing the pictures with sublimation ink onto inkjet paper as a carrier; then wrapping the paper onto the coated items and processing it under sublimation heat press machines at specific temperature and time.
